PROFESSIONAL SUMMARY

Full-stack developer specializing in end-to-end automation, from data models and APIs to interfaces, workers and deployment. Experienced in corporate products, RPAs, document processing and AI agents, with a focus on replacing manual routines with reliable, measurable systems.

PROFESSIONAL EXPERIENCE

GRUPO STUDIO

Nov 2025 - present

Artificial Intelligence Analyst (Contractor)

- Lead author of AutomaTax, a Next.js/FastAPI/PostgreSQL platform centralizing queues, data, permissions and integrations for a tax-automation ecosystem.
- Evolved the production database through 115 migrations; standardized 21 tables and 85 columns with compatibility views and no consumer downtime.
- Built integrations with SERPRO through mTLS/OAuth2, SQL Server, Google Calendar, WhatsApp and RPAs coordinated through Postgres RPCs.
- Lead developer of the Lei do Bem platform and sole author of TaxSwap, a document-automation product with OCR, audit trails, domain rules and tests.

BRIVIA GROUP

Nov 2025 - present

AI and n8n Specialist (Contractor)

- Development of n8n automations, API integrations and AI agents for digital initiatives.
- Built static and dynamic pages, orchestrated external services and produced technical content on applied AI.

ZALLPY DIGITAL

Oct 2023 - Apr 2025

Back-end Developer

- Developed and maintained TK Elevator systems using Progress 4GL.
- Contributed to automation and AI initiatives, Scrum ceremonies and operational support.

PROFESSIONAL EXPERIENCE

TOZZINIFREIRE ADVOGADOS

Dec 2021 - Oct 2023

Help Desk Assistant

- Supported more than 200 users across Active Directory, networks, virtualization and IT incident resolution.

SELECTED PROJECTS

AutomaTax | lead author

Orchestrates powers of attorney, tax documents, profile analysis, meetings and SERPRO costs. I mapped 4,862 query patterns across 107 days to plan a safe production schema evolution.

Stack: Next.js, TypeScript, FastAPI, Python, PostgreSQL, Supabase, Docker, SERPRO

TaxSwap | sole author

Wizard consolidating three financial and tax documents, using OCR for scanned PDFs and generating auditable presentations with immutable snapshots and signed URLs.

Stack: Next.js, TypeScript, Supabase, Tesseract.js, React PDF, Zod, Vitest

Social Intelligence PWA | anonymized owned product

Installable application tracking growth, followers and engagement. I structured creative testing and acquisition campaigns, reaching an average 3x ROI.

Stack: React, Node.js, PWA, REST APIs, Analytics, Meta Ads, Google Ads

TECHNICAL SKILLS

Automation

Python, Playwright, n8n, RPAs, queues, workers, webhooks and document processing

Full-stack

React, Next.js, TypeScript, JavaScript, Node.js, FastAPI and REST APIs

Data and AI

PostgreSQL, Supabase, SQL Server, MySQL, Redis, LangChain, LangGraph, RAG and OCR

Infra and growth

Docker, Vercel, Coolify, Google Cloud, Git, Meta Ads, Google Ads, GA4 and Looker Studio

EDUCATION AND LANGUAGES

Software Engineering - Uniasselvi

Studies completed through the 7th semester;
currently paused

English - CCAA

Advanced C1 level
