PROFESSIONAL SUMMARY

Results-driven Software Engineer whose career moved from technical support to back-end development and, today, to architecting complex Artificial Intelligence solutions. I turn business challenges into autonomous, efficient systems, orchestrating AI agents, end-to-end automations, LLM integrations, APIs, workers and deployment to replace manual routines with reliable systems. Strong in Python, JavaScript, TypeScript and n8n, with strategic product vision and a focus on delivering measurable value.

PROFESSIONAL EXPERIENCE

GRUPO STUDIO

Nov 2025 - present

Artificial Intelligence Analyst (Contractor)

- Lead author of AutomaTax, a Next.js/FastAPI/PostgreSQL platform centralizing queues, data, permissions and integrations for a tax-automation ecosystem.
- Evolved the production database through 115 migrations; standardized 21 tables and 85 columns with compatibility views and no consumer downtime.
- Built integrations with SERPRO through mTLS/OAuth2, SQL Server, Google Calendar, WhatsApp and RPAs coordinated through Postgres RPCs.
- Lead developer of the Lei do Bem platform and sole author of TaxSwap, a document-automation product with OCR, audit trails, domain rules and tests.
- Designed, trained and deployed machine learning, deep learning and NLP models for business needs, with testing, validation and tuning to ensure accuracy and performance.
- Collected, cleaned and prepared structured and unstructured data with quality, integrity and security, and built pipelines to feed models and intelligent systems.
- Integrated AI solutions into internal systems and corporate processes, supported technical and business teams and monitored algorithm performance with continuous improvements.
- Delivered reports, dashboards, KPIs and predictive analyses for several areas of the group, supporting leaders in data-driven decisions.
- Tracked trends in AI, automation and data science, tested new tools, frameworks and methodologies and promoted a data and innovation culture.

BRIVIA GROUP

Nov 2025 - present

AI and n8n Specialist (Contractor)

- Developed n8n automations and APIs, integrating external services for digital initiatives.
- Designed and implemented AI multi-agent systems.
- Built static and dynamic pages with several AI tools and produced technical content on Artificial Intelligence.

ZALLPY DIGITAL

Oct 2023 - Apr 2025

Back-end Developer

- Developed and maintained back-end systems for TK Elevator using Progress 4GL.
- Led automation and AI projects, took an active part in Scrum ceremonies and provided level 1 user support.

TOZZINIFREIRE ADVOGADOS

Dec 2021 - Oct 2023

Help Desk Assistant

- Provided technical support to more than 200 users and resolved IT incidents.
- Created VMs, cloned hard drives, managed Active Directory, configured networks and maintained the infrastructure.

SELECTED PROJECTS

AutomaTax | lead author

Orchestrates powers of attorney, tax documents, profile analysis, meetings and SERPRO costs. I mapped 4,862 query patterns across 107 days to plan a safe production schema evolution.

Stack: Next.js, TypeScript, FastAPI, Python, PostgreSQL, Supabase, Docker, SERPRO

TaxSwap | sole author

Wizard consolidating three financial and tax documents, using OCR for scanned PDFs and generating auditable presentations with immutable snapshots and signed URLs.

Stack: Next.js, TypeScript, Supabase, Tesseract.js, React PDF, Zod, Vitest

Social Intelligence PWA | anonymized owned product

Installable application tracking growth, followers and engagement. I structured creative testing and acquisition campaigns, reaching an average 3x ROI.

Stack: React, Node.js, PWA, REST APIs, Analytics, Meta Ads, Google Ads

TECHNICAL SKILLS

Automation	Python, Playwright, n8n, RPAs, queues, workers, webhooks and document processing
AI and Agents	AI and automation architecture, AI agents, prompt engineering, RAG, LangChain, LangGraph, OCR, LLM integration (OpenAI, Google Gemini) and AI development platforms (Lovable, Cursor, Google Antigravity)
Full-stack	Python, JavaScript, TypeScript, Node.js, React, Next.js, Progress 4GL, FastAPI, REST APIs and web applications
Data and BI	PostgreSQL, Supabase, SQL Server, MySQL, Redis, data analysis and dashboards in Power BI and Looker Studio
Infra and growth	Docker, Vercel, Coolify, Google Cloud, Microsoft Azure, Cloudflare, Meta Ads, Google Ads and GA4
Tools and methodologies	Scrum, Kanban, Jira, Git and GitHub, Trello, Bitrix24 and Airtable
Corporate IT	Active Directory, network management, virtualization and user support

EDUCATION AND LANGUAGES

Software Engineering - Uniasselvi	In progress
English - CCAA	Advanced C1 level
